TECHNOLOGY CONCERNS FOR STUDENTS WITH DISABILITIES

The Hortonville Area School District shall provide special education and related services designed to meet the unique needs of each student with a disability, based on his/her individualized education program (IEP) as required by law.

State and federal law mandates that a systematic and integrated program be established in each school district to provide appropriate learning experiences for students with disabilities or special needs.

Implementation:

- A. A student's need for assistive technology shall be determined on a case-by-case basis or as determined by the IEP.
- B. Assistive technology may be provided as special education, related services, or supplemental aids and services for students with disabilities who are educated in regular classes.
- C. The District is responsible for evaluation in areas in which assistive technology may be a factor. Determination of need for assistive technology will be determined by the following criteria:
 1. Identification of difficulty the student is experiencing and discussion of possible causes for the difficulty. This includes a review of existing information and data. During this review the IEP team decides other information necessary to make an informed decision about the need for assistive technology.
 2. Team members gather baseline data if existing data does not provide all information.
 3. The team reviews the problem that is now clearly identified, generates possible solutions and develops a trial plan of the solutions.
 4. During a specified time frame, the trials are completed and data is collected.
 5. The team analyzes new data and makes decisions about the longer term use or permanent acquisition of one or more assistive technology tools.
 6. If specific assistive technology is identified as being needed, it is written in the student's IEP.
- D. Those students having a disability under Section 504 and students with special needs, which may include, but are not limited to migrant students, homeless students, students living with poverty and English Language Learners, will also be considered for assistive technology devices and/or services on a case by case basis to be determined by the following criteria:
 1. Identification of difficulty the student is experiencing and discussion of possible causes for the difficulty by individuals or a team comprised of classroom or special education teacher, guidance counselor, librarian, district instructional technology coordinator and/or building principal. This includes a review of existing information and data. During this review a team decides other information necessary to make an informed decision about the necessity for assistive technology.
 2. Team members gather baseline data if existing data does not provide all needed information.
